

Lucien Schmid

Curious and committed

Born 04.09.2003 — 23 years old

Master's student at the École Polytechnique Fédérale de Lausanne (EPFL), holder of a bilingual Maturité gymnasiale, with a strong scientific background and hands-on experience in sustainable construction, particularly in building thermal performance. Comfortable in knowledge-sharing environments, I bring rigour and adaptability to professional settings via transversal skills.

EXPERIENCES

Pavillion RebuilT — EPFL, Switzerland

MAKE Project – building a low-tech pavillion

- Participation in construction workshops (*straw bale building, lime render/plasterwork*) and deconstruction (*carpentry*)
- Bachelor project: Trombe wall thermal optimisation
- Interdisciplinary collaboration on building physics and sustainable construction topics

Teaching assistant — Workshop SKIL, EPFL, Switzerland

Since january 2025

- Clear explanation of scientific and technical concepts
- Methodological guidance and individualised support
- Supervision of students working on course projects

Y-Fablab — Yverdon-les-Bains, Switzerland

Association for the promotion and democratisation of technology — Committee member since 2023

- Facilitation of hands-on educational workshops (*woodworking, welding, blacksmithing*)
- Establishing a safe and supportive environment fostering teamwork, autonomy, rigour, attention to detail, and curiosity

EDUCATION

Mechanical engineering, EPFL, Master

September 2025 - present | Relevant courses: Energy and comfort in buildings, Modelling and optimisation of energy systems

Mechanical engineering, EPFL, Bachelor

2022 - 2025 | Bachelor project: Trombe wall thermal optimisation

KEY SKILLS

- *Sense of responsibility, patience and consistency.*
- *Self-directed work and proactive initiative.*
- *Ability to bridge communication between scientists and practitioners.*

LANGUAGES

- *French: mother tongue*
- *English and German: fluency*

AWARD

- Curiosity Award — Gymnase d'Yverdon

PROJECTS

Working in the building sector with a special attention to sustainability, synergy between actors and energy flow optimisation.
